

Andrew Rutherford
CSCI 4113
Lab 7

1. Set hostnames according to table:
 - a. Machine A: router.dundermifflin.com.
 - b. Machine B: carriage.dundermifflin.com.
 - c. Machine C: platen.dundermifflin.com.
 - d. Machine D: chase.dundermifflin.com.
 - e. Machine E: roller.dundermifflin.com.
 - f. Machine F: saddle.dundermifflin.com.
2. Set all machines to new hostnames in `/etc/dhcp/dhcpd.conf` on Machine A
3. To make DNS server on Machine D authoritative:
 - a. Create `dundermifflin.com.` zone in `/etc/named.conf` of type master.
 - b. Create zone file in `/var/named/dundermifflin.com.` and add SOA, A, CNAME records according to table in writeup.
